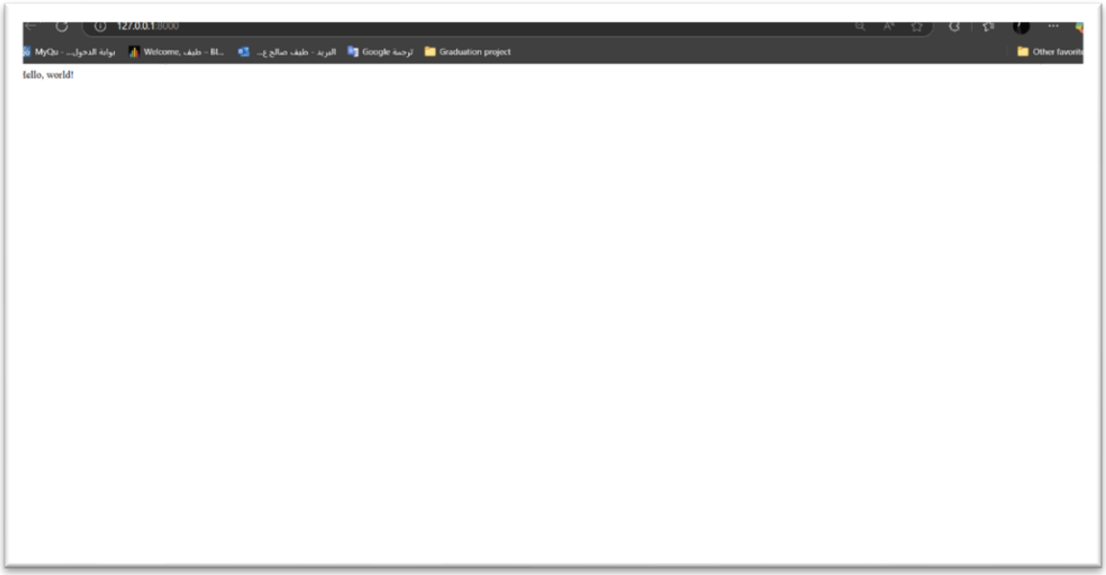
ou have 18 unapplied migration(s). Your project may not work properly until you apply the migrations for app(s): admin,
auth, contenttypes, sessions.
un 'python manage.py migrate' to apply them.
ebruary 14, 2025 - 20:49:45
jango version 5.1.5, using settings 'libraryproject.settings'
tarting development server at http://127.0.0.1:8000/
uit the server with CTRL-BREAK.
```

Step 5:



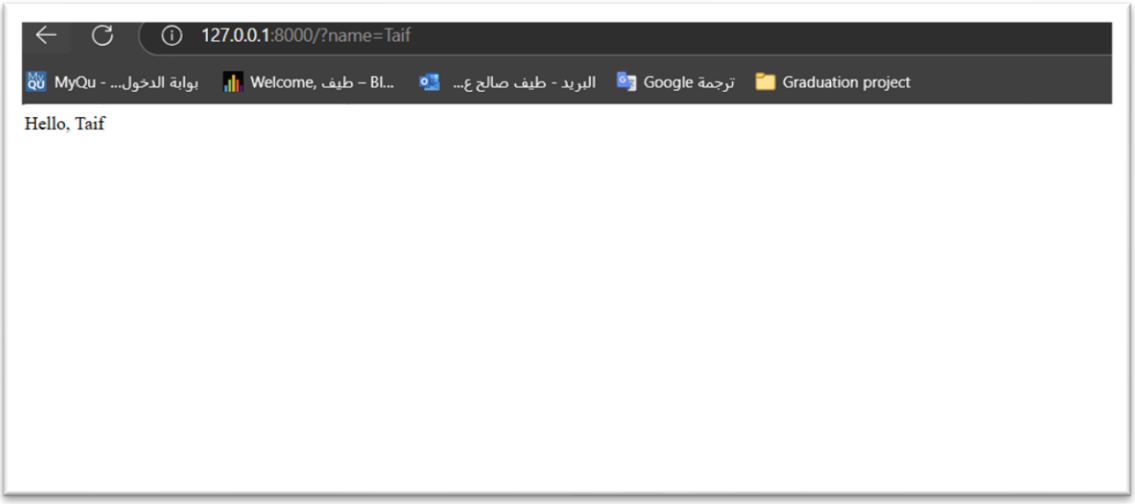
Task-2:

Step-1:

```python
from django.shortcuts import render

###
from django.http import HttpResponse
def index(request):
    #return HttpResponse("Hello, world!")
    name = request.GET.get("name") or "world!"  #add this line
    return HttpResponse("Hello, "+name) #replace the word “world!” with the variable name
```

Step-2:



Task-3:

Step-1:

```python
from django.shortcuts import render

###
from django.http import HttpResponse
def index(request):
    # return HttpResponse("Hello, world!")
    name = request.GET.get("name") or "world!"  #add this line
    return HttpResponse("Hello, "+name) #replace the word “world!” with the variable name
###
def index2(request, val1 = 0):
    return HttpResponse("value1 = "+str(val1))
```

URL configuration for libraryproject project.
The `urlpatterns` list routes URLs to views. For more information please see:
https://docs.djangoproject.com/en/5.1/topics/http/urls/
Examples:
Function views
1. Add an import: from my_app import views
2. Add a URL to urlpatterns: path('', views.home, name='home')
Class-based views
1. Add an import: from other_app.views import Home
2. Add a URL to urlpatterns: path('', Home.as_view(), name='home')
Including another URLconf
1. Import the include() function: from django.urls import include, path
2. Add a URL to urlpatterns: path('blog/', include('blog.urls'))
